## Matrices

Square brackets delimit literal matrices. Commas separate elements on the same row. Semicolons separate rows. Commas may be replaced by spaces, and semicolons may be replaced by one or more newlines. Elements of a matrix may be arbitrary expressions, provided that all the dimensions agree.

|---|---|
| [ *x*, *y*, ... ] | enter a row vector |
| [ *x*; *y*; ... ] | enter a column vector |
| [ *w*, *x*; *y*, *z* ] | enter a 2×2 matrix |

## Ranges

*base* : *limit*

*base* : *incr* : *limit*

Specify a range of values beginning with *base* with no elements greater than *limit*. If it is omitted, the default value of *incr* is 1. Negative increments are permitted.

## Strings and Comm

A *string constant* consists
enclosed in either double-c
